Tru-Flow Radiator Fan Blades

Radiator fan blades are one of the principal parts within the engine cooling system. It is important to replace the fan blade even if a tiny crack appears, otherwise the risk of an engine overheating increases.

Tru-Flow Radiator Fan Blades are sourced from quality manufacturers from tough plastic material. The range is made up of 61 part numbers to suit over 400 vehicle applications in New Zealand.

Tru-Flow Radiator Fan Blades come with a 2 year/40,000km warranty and technical support.
